

In 1973, the nieces who were molested in California visited Virginia. Star molested them again and this time was caught by his wife.

The event is in the original email sent by his son (see attached) where he states "Dad you lied and told me and Kimberly 18 years ago that Lori and one other person took their clothes off for you one time. I don't know what you told mom but she was thinking about leaving you...."

The date the incident was filed with Herndon police is right before Star II's email came out (see attached). They were going to press charges in VA for that one incident because VA does not have a statute of limitations. For some reason, the prosecution was declined. Star then sent the email.
